International Journal of Instrumentation and Control Systems (IJICS)

Scope & Topics

International Journal of Instrumentation and Control Systems (IJICS) is a Quarterly open access peerreviewed journal that publishes articles which contribute new results in all areas of Instrumentation Engineering and Control Systems. The journal focuses on all technical and practical aspects of Instrumentation Engineering and Control Systems. The goal of this journal is to bring together researchers and practitioners from academia and industry to focus on advanced instrumentation engineering, control systems and automation concepts and establishing new collaborations in these areas.

Editor In Chief:, **Fatih Korkmaz**, Cankiri Karatekin Üniversitesi , Turkey

ISSN: 2249 - 1147 [Online]; 2319 - 412X [Print]

Topics of interest

- Robust control
- Neuro-fuzzy control
- Adaptive control
- Sampled-data control systems and digital control
- Systems and automation

Contact Us: ijicsjournal@airccse.org

Price: \$ 231

International Journal of Control Theory and Computer Modeling (IJCTCM)

Scope & Topics

The International Journal of Control Theory and Computer Modeling (IJCTCM) is a bi-monthly open access peer-reviewed journal that publishes articles which contribute new results in all areas of Control Theory and Computer Modeling. The journal focuses on all technical and practical aspects of Control Theory and Computer Modeling. The goal of this journal is to bring together researchers and practitioners from academia and industry to focus on advanced control engineering and modeling concepts and establishing new collaborations in these areas..

Editor In Chief: Fatih Korkmaz, Cankiri Karatekin Üniversitesi, Turkey

ISSN: 2249-1155 [Online]; 2319 - 4138 [print]

Topics of interest

- Adaptive control
- Digital control
- Robust control
- Feedback control
- Sliding mode control

Price: \$ 231

International Journal of Information Technology, Control and Automation (IJITCA)

Scope & Topics

The International Journal of Information Technology, Control and Automation (IJITCA) is a Quarterly open access peer-reviewed journal that publishes articles which contribute new results in all areas of Information Technology (IT), Control Systems and Automation Engineering. The journal focuses on all technical and practical aspects of IT, Control Systems and Automation with applications in real-world engineering and scientific problems. The goal of this journal is to bring together researchers and practitioners from academia and industry to focus on information technology, control engineering, automation, modeling concepts and establishing new collaborations in these areas.

Editor In Chief: **David C. Wyld**, Southeastern Louisiana University, USA

ISSN: 1839-6682

Topics of interest

- Automation systems
- Computer controlled systems
- Computer vision
- Computational biology
- Control devices and instruments

URL:

http://airccse.org/journal/ijitca/ijitca.html

Contact Us: ijitca@wireilla.com

Price: \$ 231

International Journal of Chaos, Control, Modelling and Simulation (IJCCMS)

Scope & Topics

The International Journal of Chaos, Control, Modeling and Simulation is a bi-monthly open access peerreviewed journal that publishes articles which contribute new results in all areas of Chaos Theory, Control Systems, Scientific Modeling and Computer Simulation. In the last few decades, chaos theory has found important applications in secure communication devices and secure data encryption. Control methods are very useful in several applied areas like Chaos, Automation. Communication ,Robotics, Power Systems, and Biomedical Instrumentation. The journal focuses on all technical and practical aspects of Chaos, Control, Modeling and Simulation. The goal of this journal is to bring together researchers and practitioners from academia and industry to focus on chaotic systems and applications, control theory, process control, automation, modeling concepts, computational methods, computer simulation and establishing new collaborations in these areas..

Editor In Chief: Aditya Goel, Comviva Technologies Ltd., India

ISSN: 2319 - 5398 [Online] ; 2319 - 8990 [Print]

Topics of interest

- Automation and mobile robots
- Bioinformatics
- Biological modeling
- Biological systems and models
- Chaotic systems

URL:

http://airccse.org/journal/ijccms/index.html

Contact Us: ijccmsjournal@airccse.org

Price: \$ 231

International Journal of Information Technology, Modeling and Computing (IJITMC)

Scope & Topics

The International Journal of Information Technology, Modeling and Computing (IJITMC) is an open access peer-reviewed journal that publishes articles which contribute new results in all areas of Information Technology, Modeling and Computing. With the advances of Information Technology, there is an active multi-disciplinary research in the areas of IT, CSE, Modeling and Simulation with numerous applications in various fields. The International Journal of Information Technology, Modeling and Computing (IJITMC) is an abstracted and indexed international journal of high quality devoted to the publication of original research papers from IT, Modeling, CSE and Control Engineering with some emphasis on all areas and subareas of computer science, IT, modeling, scientific simulation, visualization and control systems and their broad range of applications.

Editor In Chief: Alarcon Ramirez, Howard University, USA

ISSN: 2320-7493 (Online) ; 2320 - 8449 (Print)

Topics of interest

- Automation
- Bio-informatics
- Bio-modeling and applications
- Chaos theory and control
- Compression techniques
