International Journal of Database Management Systems (IJDMS)

Scope & Topics

The International Journal of Database Management Systems (IJDMS) is a bi monthly open access peer-reviewed journal that publishes articles which contribute new results in all areas of the database management systems & its applications. The goal of this journal is to bring together researchers and practitioners from academia and industry to focus on understanding Modern developments in this filed, and establishing new collaborations in these areas.

Editor In Chief: Sugam Sharma, Iowa State University, US

ISSN: 0975-5705 (Online); 0975-5985 (Print)

Topics of interest

- Constraint Modelling and Processing
- Data and Information Integration & Modelling
- Data and Information Networks
- Data and Information Privacy and Security
- Data and Information Quality
- Data and Information Semantics

International Journal of Data Mining & Knowledge Management Process (IJDMP)

Scope & Topics

Data mining and knowledge discovery in databases have been attracting a significant amount of research, industry, and media attention of late. There is an urgent need for a new generation of computational theories and tools to assist researchers in extracting useful information from the rapidly growing volumes of digital data.

Editor In Chief: Natasa Zivic, University of Siegen, Germany

ISSN: 2230-9608(Online); 2231-007X(Print)

Topics of interest

- Parallel and Distributed Data Mining Algorithms
- Data Streams Mining
- Graph Mining
- Spatial Data Mining
- Text video
- Multimedia Data
